Bred Fulk was named the Lynbrook High School Certificated Employee of the Year by the Fremont Union High School District Board of Trustees at its meeting on February 28, 2017. Brad began his teaching career at Lynbrook in the Fall of 2012, teaching math and Java computer programming. Prior to joining the Lynbrook staff, Brad taught and coached football, basketball and track at West Platte R-II High School in Weston, Missouri. During the course of his career, he has taught Pre-Algebra, Algebra I & II, Geometry, Applied Mathematics I & II, Intervention Mathematics, Java and AP Computer Science.

Brad loves that teaching allows him to have an impact on so many people in so many different ways. He is grateful for the opportunity to work with students of all abilities and the chance to collaborate with his colleagues through a robust program of professional development. “I love the challenge that comes with teaching Lynbrook students,” said Brad. “Every day presents a new problem to solve, and many of our students push me and challenge me more than they probably realize.”

Lynbrook students share that Brad has created a fun and spirited, yet disciplined, classroom environment, while colleagues praise him for helping staff to embrace wider frontiers in the area of professional development.

Brad is currently the Lynbrook DECA advisor, and has been honored as the California Advisor of the Year for DECA. He previously served as the head coach for Junior Varsity football and line coach for Varsity football for several years. Brad is also the web-development advisor, professional development coordinator and team lead for WASC accreditation at Lynbrook.

Brad was born and raised in Weston, Missouri, where he graduated from West Platte R-II High School. His most cherished high school memory is winning a state championship in football during his senior year. Brad went on to the University of Missouri in Kansas City, where he studied both Electrical & Computer Engineering and Secondary Mathematics Education. He has been married to his wife Karlina for six years, after a chance meeting at a San Francisco Giants game. Together they have three children, twins Layla and Leah (5) and son Titus (2). Brad loves tinkering with anything computer related, listening to and playing music and being involved in his children’s hobbies, including dance and softball.
